

• Data e Innovation • Fullstack Developer Junior • PowerBI • React • Nodejs

System Engineer graduated from Simón Bolívar University, bilingual, with one year of experience in project development, process automation for accounting and payroll, and the development of efficient dashboards for the presentation of key performance indicators and financial statements. Highly capable of optimizing processes with a focus on operational efficiency. Prior to this, I have experience in small-scale project development and web development.

Strong ability to adapt to change, efficiently tackle new challenges, and ensure excellent results. Creative in developing and implementing processes that seek operational synergies, with excellent teamwork qualities such as communication, respect, and flexibility. I possess a high level of commitment, responsibility, and dedication.
